# The Way to Exascale: From Theorics to Applied Problems

Vers l'Exascale: Des Problèmes Théoriques aux Problèmes Appliqués

---

par **Julien Loiseau**

Thèse de doctorat d'Informatique

Sous la direction de : **M. Michaël KRAJECKI, Professeur des Universités**

## JURY

??	??	Rapporteur
??	??	Rapporteur
Benjamin Bergen	Docteur-Ingénieur au Los Alamos National Laboratory, USA	Examineur
Guillaume Colin de Verdière	Ingénieur au CEA	Examineur
Michaël KRAJECKI	Professeur à l'Université de Reims Champagne-Ardenne	Directeur
Christophe JAILLET	Maître de Conférence à l'Université de Reims Champagne-Ardenne	Co-directeur
François ALIN	Maître de Conférence à l'Université de Reims Champagne-Ardenne	Encadrant

# Introduction

# Chapter 1

## HPC and Exascale

### 1.1 Introduction

We only consider homogenes cluster in that work.

### 1.2 Parallelism

#### 1.2.1 Flynn taxonomy

The flynn taxonomy presents a hierarchical organization of computation machine.

In this classification [?], Michael J. Flynn present the SIMD, SISI, MISD and MIMD. Add table and present some example of machines

#### 1.2.2 Goals

**Latency and Speedup**

#### 1.2.3 Bottlenecks

#### 1.2.4 Amdahl and Gustafson

The Amdahl's law is use to find the theoretical speedup in latency of a program. We can separate a program in two parts, the one that can be execute in parallel and the one that is sequential. And even if we reduce the parallel part to infinite the sequential part will reach 100% of the total time.

## 1.3 Hardware

### 1.3.1 Classical CPU

### 1.3.2 GPU

### 1.3.3 FPGA and ASICs

## 1.4 Clusters and Exascale

### 1.4.1 Benchmarking

TOP500

### 1.4.2 Composition and usage

### 1.4.3 Interconnection

## 1.5 Languages

### 1.5.1 Accelerators

### 1.5.2 Runtimes

## 1.6 Optimization

Memory locality

Vectorization

### 1.6.1 CPU specifications

### 1.6.2 GPUs specifications

### 1.6.3 Communications

## 1.7 Conclusion

# Chapter 2

## Complex systems

### 2.1 Introduction

### 2.2 Combinatorial problems

#### 2.2.1 Combinatorial search

#### 2.2.2 Combinatorial optimization

### 2.3 A case study, the Langford problem

Use the articles here for figures and a base report.

### 2.4 Complex systems as a benchmark

### 2.5 GRAPH500

Use the articles here too

### 2.6 Conclusion

## Chapter 3

# Application

# Conclusion
